

# Battling your Biased Brain

Peter Wessels @ DevBCN

Scan the code to participate..

or go to **[bit.ly/biasedbrain](https://bit.ly/biasedbrain)**

Please raise your hand when you are done.

Was Mahatma  
Gandhi older or  
younger than  
9 years old when  
he died?

A

Was Mahatma  
Gandhi older or  
younger than  
140 years old  
when he died?

B

At what age did  
Mahatma Gandhi die?

78 years

**Mahatma Gandhi**

1869 – 1948

# How old was Gandhi when he died?

This difference can be explained by the  
**anchoring effect.**

Fritz Strack and Mussweiler, Thomas. *Considering the Impossible: Explaining the Effects of Implausible Anchors*. *Social Cognition*, Vol. 19, No. 2, 2001, pp. 145-160”

..older or younger  
than (9 OR 140) years..

Question	Actual value	Plausible anchors		Implausible anchors	
		High	Low	High	Low
Antarctic: mean temperature in winter (°C)	-68	-17	-43	45	-210
Einstein: year of first visit to United States	1921	1939	1905	1992	1215
Da Vinci: year of birth	1452	1608	1391	1952	-300
<b>Gandhi: age</b>	<b>78</b>	<b>79</b>	<b>64</b>	<b>140</b>	<b>9</b>
Ulm: altitude (m)	478	320	150	10,500	1,700
Aristotle: year of birth	-322	-220	-490	1832	-25,000
Whale: length (m)	33.0	49.0	21.0	900.0	0.2
Elbe: length (km)	1,165	890	550	45,000	25

**Table 6**  
*Overall z Values, Study 3*

Anchor	Plausible	Implausible
High	.04 (79)	.25 (140?)
Low	-.13 (64)	-.17 (9?)

*Note.*  $n = 67$  for all cells.

We can also experience this effect when we make software.

Planning poker

These patterns are identified as  
**cognitive biases.**

And there are more than 100 ways how you can be influenced.

# Who am I?

- IT Consultant @ Info Support
- Software engineer, teacher, leader of the Java Community @ Info Support
- Disclaimer: claims are based on research and empirical evidence.

Today, I want to talk about **3**  
**common ways** you can be  
influenced.

# #1 When labour leads to love.

# "THE EFFECT"

MANHOWIE.COM

**Including labor in the building process increases the perceived value of the product for the builder.**

Research by Michael Norton, Daniel Mochon, and Dan Ariely

Builders

Non-Builders

Builders

Non-Builders

# Do you like the product?

52% ▲

Non-builders: 2.5

Builders: 3.8

# How much do you want to pay for this product?

63% ▲

Non-builders:  $M = \$0.48$

Builders:  $M = \$0.78$

**We make stuff. Are we also subject to the IKEA-effect?**

Well, I definitely am.

And you probably too..

**Before & during the work**

To build or not to build it  
(completely) yourself?

**After the work**

Asses your ~~baby~~ product

**After the work**

When opening up a pull-request, are you able to **objectively value your work?**

Does it sometimes hurt when someone doesn't value your code?

After the work

**Building upon a messy foundation ended up in long nights making up for it.**

Major refactoring and rework was required to address the problems we introduced at the start.

# When building things from yourself..

- Investment
- Time to market
- Other problems may arise

**Before the work**

Do you really consider tapping into  
**external solutions or knowledge** when  
you can build it yourself?

Do you weight your options objectively?

# Does this sounds familiar?

Who of you can relate to the IKEA effect?

# Why are we subjected to this bias?

## Why we subjected to this bias?

- The need for competency
- Effort justification

# How can we prevent the IKEA-effect?

**Consider third-party products: stand on the shoulder of giants.**

# is-odd

npm v3.0.1

downloads 1.9M/month

downloads 33M

Travis no longer available

Returns true if the given number is odd, and is an integer that does not exceed the JavaScript `MAXIMUM_SAFE_INTEGER`.

Please consider following this project's author, [Jon Schlinkert](#), and consider starring the project to show your ❤️ and support.

**You are not the first to a problem..  
..even in new technologies**

foojay.io

# Make your choices explicit (with Architectural Decision Records).

You can review, store and re-evaluate them.

**Be aware of your bias: Admit to yourself that you love it because you built it**

**We can be more effective and efficient if we prevent the IKEA-effect**

# #2 Joining the majority

**Ooh, a green-field project.**

AUTENTICO MARRON  
FRANCES EN ALMIBAR  
52,00 €/Kg | 13,00 €/1/4Kg  
1.10 €/Unidades

MACARONS FRANCES  
AUTENTICO  
52,00 €/Kg | 13,00 €/1/4Kg  
1.10 €/Unidades

- The struggle was real
- Being productive and learning new stuff
- Rework was inevitable

# Bandwagon effect

# The tendency for people to align their beliefs and behaviors with those of a group..

..regardless of the underlying evidence.

You can see it everywhere: Stock,  
(social) media & politics

# Political polls **captures** and potentially **influences** decisions: voters tend to change their vote to **the winning party**

Research by Áron Kiss & Gábor Simonovits

# Joining the majority in a meeting

# When you base your technology decisions on popularity instead of the eligibility..

You might not have the best fit-for-purpose..

# Are you working on a monolith?

# Going against the bandwagon requires bravery

Do you dare to challenge decisions and stand-by your views?

# Some bandwagons lead you somewhere.

Subversion to GIT,  
SOAP to REST,  
XML to JSON

# Why are we subjected to this bias?

# The availability heuristic, what you see is what you get.

Tversky & Kahneman (1973)

## Other causes..

- Social proof
- Desire to be liked and accepted
- The majority is right

# How can we prevent the **bandwagon-effect**?

**Be aware of your bias: Identify when you join a majority**

AAAAAH

# Educate yourself with the hype-cycle

## In case of new technologies..

- What problem does it solve? (better than before)?
- Do I have that problem?
- Do I (fully) understand the trade-off?
- What complexity does it add?

# “Be aware about the survivorship bias.”

By Hanno Embregts & Maarten Mulders

# #3 Love the ceremony

Stand ups, refinements,  
retrospectives, planning, review,  
'1-on-1's, scrum-of-scrums,  
architecture review, business  
meeting, change-board's

**ACCEPT JOB AS SENIOR ENGINEER**

**8 HOURS OF MEETINGS A DAY**

# Bike Shed Effect – a/k/a Parkinson's Law of Triviality

Nuclear plant  
cost: \$28,000,000  
discussion: 2,5 minutes

Bike shed  
cost: \$1000  
discussion: 45 minutes

Adam Grant   
@AdamMGrant

Sorting email into folders is a huge waste of time.

The data: it takes an average of 67 hours a year, and actually makes it harder for you to find stuff.

It's more efficient to just file all your messages in a single folder for saved mail.

[drive.google.com/file/d/1LSi-ZI...](https://drive.google.com/file/d/1LSi-ZI...)

**Table 5.** Success and efficiency of finding sequences for High and Low filers based on median split of percent messages in folders.

Measure	% Mailbox Foldered	Mean	SD	Significance
% of All Sequences that are Successful	High	<b>0.88</b>	.12	t(356) = 0.98, p > 0.05
	Low	<b>0.88</b>	.11	
Sequence Duration (secs)	High	<b>72.87</b>	38.05	t(356) = 1.97, p < 0.05
	Low	<b>66.07</b>	26.64	
# Operations	High	<b>3.69</b>	1.46	t(356) = 2.17, p < 0.05
	Low	<b>4.16</b>	2.50	

2:26 PM · Nov 5, 2020

# We tend to **allocate** disproportionately amount of time on **easier tasks**.

Research by C. Northcote Parkinson

RADREADS.CO

**“...just because you are capable of building a bikeshed  
[..] you not need to argue about every little feature just  
because you know enough to do so.”**

<http://phk.freebsd.dk/sagas/bikeshed/>

# Why are we subjected to this bias?

# We feel more comfortable with these tasks.

Tabs vs Spaces  
Single quotes and double quotes  
Flame wars about tools

*"Please use `List.emptyList()` instead of `List.of()`"*

*Make sure you use the 'Final' keyword*

*Please use the Stream-API, it will be much faster..*

# How can we prevent the **bike shedding effect**?

# Automate your trivial matters

We are in the business of automation, right?

- Error-prone by Google
- Checkstyle
- Sonar
- Spotless
- Open Rewrite

# Make your meetings worth your time.

By structurizing your meetings

## Structurize your meetings

1. Set a goal for each meeting
2. Keep on-topic: focus on outcomes
3. Use feedback loops
4. Dedicate time for complex matters.

"THE **IKEA** EFFECT"

**Bike Shed Effect** – a/k/a Parkinson's Law of Triviality

Nuclear plant  
cost: \$28,000,000  
discussion: 2,5 minutes

Bike shed  
cost: \$1000  
discussion: 45 minutes

**IKEA effect:** When labour leads to love  
**Bandwagon Effect:** Jump on the hype train  
**Bike Shedding Effect:** Wasting your time on trivial tasks

**If you are aware of your biases, you are able to battle your biased brain.**

In hindsight, we should have done things differently..

# Hindsight Bias: people convince themselves that a past event was predictable or inevitable

Thanks, Captain Hindsight!

*“The future depends on what  
you do today”*

— **Mahatma Gandhi**

Thank you for your attention!
